

FOR IMMEDIATE RELEASE

NORR's Parking Garage at Halifax International Airport recognized with 2010 PCI Design Award

Toronto, ON – July 13, 2010 - Jurors for the Precast / Prestressed Concrete Institute's (PCI) 2010 PCI Design Awards selected NORR's submission of the Halifax International Airport (HIA) Parking Garage in Enfield, Nova Scotia as the winner in the category Best Parking Structure.

HIA, Atlantic Canada's principal full-service airport, is experiencing growth in all sectors. One component of the Halifax International Airport Authority's (HIAA's) groundside development called for a new 2400 space parking garage located north and west of the Terminal Building.

"Since it opened its doors in 1960, passenger volume at HIA has increased dramatically," says Rolfe Kaartinen, NORR's VP, Transportation. "So the main challenge for this project was to dramatically increase the efficiency of the pedestrian and automotive traffic routes into and around the terminal building to meet current and future demand."

The annual PCI awards are presented to projects which exhibit excellence in precast, prestressed concrete structures in one of two primary categories: buildings and transportation. This year's call for entries resulted in a field of approximately 140 high-caliber entries, from which three juries selected a total of 30 award winners.
